**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The previous indication of allowability is withdrawn in view of the following new grounds of rejection. The withdrawal of the indication of allowability is regretted.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 9-15 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fritz et al (US 5,702,007) (fig. 15 emb) in view of either Gibson (US 7,051,909) or Lawler et al (US 5,516,020). Fritz et al discloses a rack including a main body member formed by the horizontal bar, first and second support assemblies formed by the vertical bars, respectively and wheel chock assemblies 10. The wheel chock assemblies include connection members 24 and means formed by the inner friction surface of the members 24 and the frictional wheel wells of the chocks. Fritz et al does not disclose attachment of the support assemblies to a vehicle. Each of Gibson and Lawler et al teaches that it is known to attach support racks to the bed of a vehicle. It would have been obvious to attach the rack of Fritz et al to the bed of a vehicle as taught by either Gibson or Lawler et al to allow transport of the rack from place to place. The mounting of bicycle/motorcycle racks to vehicles is well known in this art.

***Allowable Subject Matter***

4. Claims 23-45 are allowed.

5. Claims 2-8, 16 and 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
